

## Lab 9 - Working with jQuery (3%)

### Part 1: TOGGLE BOXES (1%)

REQUIREMENTS: *Using lab9-1-jquery.html/js...*

***Create sliding panels for the content boxes.***

1. The paragraphs start hidden.
2. The paragraphs show and hide when their headings are clicked.
3. This process should take 3 seconds.
4. Mousing over the paragraph will reverse the colours of the text and background. Mousing out will switch the colours back to their original values.

### Part 2: INVENTORY PAGE (1%)

REQUIREMENTS: *Using lab9-2-jquery.html/js...*

***Create a more user-friendly table with jQuery.***

1. When the page first loads, the user does not see any text under the *Description* heading.
2. If the user puts the cursor over a row, that row alone becomes red.
3. If the user clicks on a row, the description for that item appears.
4. Only one description is visible at a time.

### EXTRA CHALLENGE (1%)

**Part 1:** When the user clicks to open a tab, all other open tabs close.

**Part 1 and 2:** Replace any inline styling that you have added through jQuery with a method that will add styling through a class in CSS.
